PROJECTS

Decision Companion , *React, JavaScript, Vite, localStorage, Vitest*
- Built an interactive decision-making application using weighted criteria and dynamic rankings.
- Implemented persistent storage, undo history, data import/export and printable reports.
- Added bilingual EN/GR support with unit and UI integration testing.

The Unbroken: Gladiator's Rise , *Java, JavaFX, OOP, File I/O*
- Developed a desktop RPG featuring turn-based combat, character progression and equipment systems..
- Designed modular OOP architecture separating game logic from the JavaFX UI.
- Implemented multiple save slots, persistence and automated validation of core gameplay systems.

PROFESSIONAL EXPERIENCE

Officer, *Hellenic Army* 06/2018 – Present
- Led and coordinated teams in demanding environments with clear communication and accountability.
- Planned activities and allocated personnel and resources against time-sensitive priorities.
- Made decisions and solved problems under pressure, adapting to changing circumstances.
- Trained and mentored personnel while maintaining professional standards.
